

Windlichter mit FIMO dekoriert

Instructions No. 209

Colourful and cheerful - these lanterns will bring good humour to your table. The creative **Modelling clay FIMO®** in numerous brilliant colours is perfect for creating spring-fresh decorations.

Here's how it's done:

The processing itself is child's play and there are almost no limits to the possibilities. 5 or 3 cm-Adhesive tape wide strips of masking tape on the glass cylinders with crepe, dab light blue frost on them.

For Wind light each half or one block of Fimo Soft Transparent and Transp. green softly knead, roll out a little with the rolling pin and turn individually on level 1-2 through the **SCULPEY kneading machine**. Place both plates on top of each other and turn them together through the kneading machine. Gradually increase to level 5, folding the plates again and again colour by colour

The glass cylinders with the FIMO-Coat the boards, smooth out any air bubbles, cut off any excess material and smooth the seams with your finger. The different FIMO Softly knead soft colours, roll with the **SCULPEY kneading machine** up to level 5. Cut out the motifs using the templates, press them onto the glass cylinders. Place the glass cylinders in the cold oven and heat it to 110°C. When the temperature has been reached, put them **in the oven** for 30 minutes and let them cool down. Paint the contours with white DECOpainter. Finally, Satin ribbon decorate the lanterns.
