

Window decoration with houses in a metal ring

Instructions No. 3107

Difficulty: Beginner 🍷🍷🍷🍷

Working time: 2 Hours 30 Minutes

This decorative ring is a real eye-catcher! You can hang it in the window. But the Christmas metal ring also looks very elegant on a wall or door. You can also create a matching Christmas wooden building kit in the same style as a table decoration. Be inspired by our ideas for crafting here.

The basis for the window decoration is a black metal ring, Ø 30 cm. The decorative house front is already permanently installed and a hanging loop guarantees that everything will hang perfectly.

Match the look of the wooden building kit to the decorative ring: Paint the roofs of the houses with a black marker. You can also emphasise the windows, doors and stars with black.

Use the bouillon effect wire to attach the conifer branches to the metal ring. Decorate one side of the ring with satin ribbon and jingles. Tie a hanging ribbon to the eyelet of the metal ring - and your new window decoration is ready.

The VBS wooden building kit "Christmas houses with fir trees" consists of 12 parts. First paint all the wooden parts with the black marker. Then simply plug everything together. Coat the joints with a little glue. This will keep the house decorations firmly together.
